Alert Details

Alert ID	TRD-20260607-WSH-0001
Pattern	WASH TRADING
Trader	T-9033
Instrument	MSFT
Severity	MEDIUM
Anomaly	+0.6σ vs 30-day baseline
Detected At	2026-06-06 19:02:16 UTC

AI Triage Verdict (Claude)

Verdict	ESCALATE
Confidence	87%
False Positive Probability	10%
API Call Cost	mock / cached

Rationale

Eight matched BUY/SELL pairs between T-9033 and T-9034 — confirmed shared beneficial owner BO-5001 — with price deviation under 0.01% and time offset under 2 seconds constitutes textbook wash trading. Wash fraction of 76% of MSFT window volume indicates coordinated artificial volume creation with no genuine economic transfer. Internal portfolio transfer is ruled out by the rapid reciprocal cycling pattern.

Key Factors

- 8 matched pairs with 76% wash fraction of window volume
- Confirmed shared beneficial owner BO-5001 across both accounts
- Price deviation <0.01% — effectively same-price circular trading
- No legitimate portfolio transfer rationale for sub-2s reciprocal matching

Recommended Action

Escalate both accounts T-9033 and T-9034; freeze under BO-5001 entity; cross-reference all positions for the beneficial owner group.
